Assessments and Business Value

Altius IT's network and security assessments:

- Determine if your IT funds are effectively being used
- Identify and quantify your IT related strengths and weaknesses
- Help you focus on those areas that create the most value for your firm

While some organizations want tactical advice on the state of the IT department, others want to maximize their investment in IT by developing and implementing a formal strategy.

Before an organization can develop and execute strategy, Altius IT's network and security assessments help your organization understand its IT infrastructure and related strengths and weaknesses.

Assessments add business value and help you maximize your investment in your IT infrastructure.

Assessments vs. Audits

Altius IT provides both network and security assessments as well as network and security audits.

- Assessments - we review your systems, people, and processes to help your organization manage its risks. For more information, please see our assessment Work Plan or download one of our Executive Summary documents.
- Audits - Altius IT reviews your systems and compares with standards and compliance regulations that may apply to your organization.

We recommend that your organization first start with our network and security assessments prior to using our audit services.

Case Study: Security Assessment

Client Situation

A mid-size health care product manufacturer is growing rapidly and ready for an initial public stock offering (IPO). The organization is concerned about compliance related issues and management wants a security assessment of the IT infrastructure.

Altius IT Solution

Altius IT provided a security assessment with an analysis of best practices, change control processes, patch management, hand held PDAs, and laptops. Our services included a review of:

- Risk tolerance – risk analysis, downtime costs
- Network security – servers, firewalls, VPN
- Electronic threats – protection
- Security practices – management, documents
- Removable media – USB devices, CD-RW
- Risk management – Single points of failure (SPOF)

Our analysis included a comparison of the IT department with industry benchmarks so the organization could evaluate if they were making effective use of IT spending. Altius IT also reviewed written policies, business continuity plans, and related procedures and guidelines.

Altius IT's provided a report of findings as well as recommendations, costs, and a prioritized Action Plan.

Client Benefit

Altius IT's security assessment documented several areas that placed the organization at risk to both internal and external threats. The prioritized Action Plan helped the organization increase security and protect its information assets.

We Help Businesses Succeed

Altius IT's in-depth experience ensures that your business receives enhanced services and increased performance.

As a leading information technology (IT) resource, our track record of helping businesses succeed is featured on *MSNBC* and in over 40 publications including *The Wall Street Journal*, *Business Week*, *the Los Angeles Times*, and *USA Today*.
