- We get more out of systems
- We customize our suites of services to your specific needs

Get Started On Advanced Networking

Call us today to take advantage of our advanced networking services (714) 442-6670.

Case Study: Security

An organization needs to protect their information assets from internal employees and external intruders.

Client Situation

A large company is concerned about the integrity of their network. Nightly tape backups are being performed but not verified for accuracy. Anti-virus software is installed but is not updated. Employees have access to most files on the server and the files are not organized by business function. Employee productivity is on a decline as the volume of work is increasing. The high speed connection to the Internet has little internal protection and compromises the integrity of client data.

Altius IT Solution

Altius IT's *Secure IT* service implements a formalized system backup schedule with off-site rotation. Anti-virus software is automatically updated on a daily basis. Files on the network are organized by business function and employee network access restrictions are implemented.

Altius IT's *Secure IT* service installs a firewall to protect against intruders. Encryption and document archival/destruction solutions are installed to protect the confidentiality of information. Employee Internet access is restricted and monitored.

Our *Secure IT* service provides a security assessment, penetration analysis with security analysis software and a review of the client's Security Policy and Procedures Manual. Corrective action is implemented to correct security vulnerabilities. 7 days a week through Altius IT's *Ensure IT* service.

We Help Businesses Succeed

Altius IT provides your organization with an exceptional five star level of service. Coupled with our in-depth experience, we ensure that your business receives enhanced services and increased performance.

As a leading information technology (IT) resource, our track record of helping businesses succeed is featured on *MSNBC* and in over 40 publications including *The Wall Street Journal*, *Business Week*, *the Los Angeles Times*, and *USA Today*.
