ALTIUS IT TACKLES NATIONAL CYBER CRIME

Federal agencies at National Cyber Crime Symposium seek Altius IT's cyber crime and risk response expertise

Santa Ana, CA – Altius Information Technologies, Inc. will present cyber crime findings to federal agencies at the National Cyber Crime Symposium in Long Beach, California.

“Cyber crime is a national security concern. We are seeing a drastically growing trend in cyber crimes and an increased importance at the Federal Level for securing information assets. Our findings will be presented to top federal agencies to help them better understand and identify cyber risks and activities before they become full fledged security problems” explains Altius IT Managing Principal Jim Kelton.

Altius IT is regularly sought out by federal government agencies to present findings on information technology risks and solutions for addressing cyber crimes.

“Our knowledge and risk response plans have been built through decades of finding and managing information technology and cyber risks for Fortune 500 companies, Forbes 400 members, U.S. government agencies, foreign governments, start-up companies and privately held companies with revenues from \$5 million to \$500 million. Through our proprietary risk identification and assessment processes, we’ve helped secure federal agencies and government institutions from cyber crime and information security risks” says Mr. Kelton. “We’re proud of that.”

Altius Information Technologies, Inc. is a risk management and security assessment firm that provides comprehensive risk assessment services that focus on all three critical risk factors including technology, people and process. In addition to focusing on all critical risk factors, Altius IT provides risk analysis and customized, prioritized risk response plans to ensure complete and effective risk management for client organizations. Altius Information Technologies, Inc. is headquartered in Orange County, CA.
